

WI-38

CCL-75™

WI-38 cell line is the first human diploid cell line to be used in human vaccine preparation. WI-38 cells were isolated from the lung tissue of a 3-month-old, female, embryo. WI-38 is used in viruscide testing.

Product category

Human cells

Organism

Homo sapiens, human

Cell type

fibroblast

Morphology

fibroblast

Tissue

Lung

Disease

Normal

Applications

3D cell culture
Bioproduction

Product format

Frozen

Storage conditions

Vapor phase of liquid nitrogen

Required Products

These products are vital for the proper use of this item and have been confirmed as effective in supporting functionality. If you use alternative products, the quality and effectiveness of the item may be affected.
